CONVEYOR ROLLERS

HIGH QUALITY CONVEYOR ROLLERS

INDIA'S LARGEST ROLLER MANUFACTURER

www.convelinerollers.com

CHOOSING CONVELINE FOR YOUR ROLLERS

GUARANTEED ON-TIME DELIVERY SCHEDULING SYSTEM

At Conveline Systems, we have always maintained a high-quality through put of raw materials and components. Production facilities continuously evolve over time, and therefore a timely delivery of meticulously worked upon solutions as per your requirement is supremely important.

There are times when you may require your order to be processed and presented within time frames as short as a week, or even less. Conveline Systems is the only firm, who has the expertise as well as resources to process & deliver even large quantities within such short intervals

COMPETITIVE PRICES

Our huge quantities of raw materials in stock let us maintain stable prices of our solutions and we can offer our products at a reasonably lower rate than the market prices. We can even offer better prices if for you have requirement of larger quantities. Our continuous investment in technology enables us to improve upon our cost and the same can be passed on to our customers.

CUSTOMER SERVICE

Conveline Systems aims to become world class conveyor roller manufacturer by providing the best possible support to our customers globally. Our staff consists of dedicated project engineers, production and application teams and they are ready to provide fast and effective support. Our Highly skilled team ensures that your material handling automation is running at peak performance for maximum productivity.

HIGH QUALITY ROLLERS

Our USP lies within our ability to provide best quality and high-performance rollers at a schedule that matches with your project timelines.

Our production design & service team liaise with you, continuously gathering inputs based on your requirement, during the various stages of our quality checking system.

EXPERIENCE AND PRODUCT KNOWLEDGE

With our experience in this industry and our expert team can help which roller to choose from depending on application of your equipment.

We consider factors such as product size and weight, operating conditions as well as cleanliness of your production facilities. We also consider how our products can increase the reliability, performance or shelf life of your equipment.

EXTENSIVE PRODUCT RANGE

Our extensive range of rollers includes stainless steel, zinc-plated, mild steel and PVC with tube diameters ranging 25mm to 89mm.

Whether your requirement is to handle small boxes or heavy pallets, conveying wet or dry items, building gravity conveyors or chain driven systems, it's very likely that there is a roller that suits your application within our vast range of solutions.

Inspired by Excellence

A COMPREHENSIVE RANGE OF ROLLERS FOR SPECIFIC INDUSTRY SECTORS

Our comprehensive range of rollers is sufficient to suffice most of the industrial requirements. Today, we supply hundreds of rollers to various industry sectors throughout India and Globally.

CONVEYOR MANUFACTURER

AIR CARGO & AIRPORT

THE CONVELINE ROLLER RANGE

GRAVITY CONVEYOR ROLLERS

Our wide range of gravity rollers covers applications from light to heavy duty industry requirements. Significant benefits for gravity application are our free running bearings that allow gravity conveyor rollers to give peak performance all the time. Our wide range of gravity rollers include mild steel, stainless steel and plastic, delivering a handling performance of up-to 500kg per roller.

FIXED DRIVEN CONVEYOR ROLLERS

Our fixed driven conveyor rollers range from 50mm diameter medium duty to 89mm diameter heavy duty steel rollers fitted with welded Steel Sprockets, Polyamide Sprocket, Poly V Belt Drive, Timing Belt Drive and O Ring Drive. Single and Double sprocket options are available for all fixed driven conveyor rollers.

GROOVED CONVEYOR ROLLERS

Grooved rollers for lineshaft conveyors are available with zinc plated steel tubes and stainless-steel tubes in a choice of tube diameters 50mm. Single or double grooved rollers are available. You can choose the number and location of grooves, while anti-static construction is standard.

Inspired by Excellence

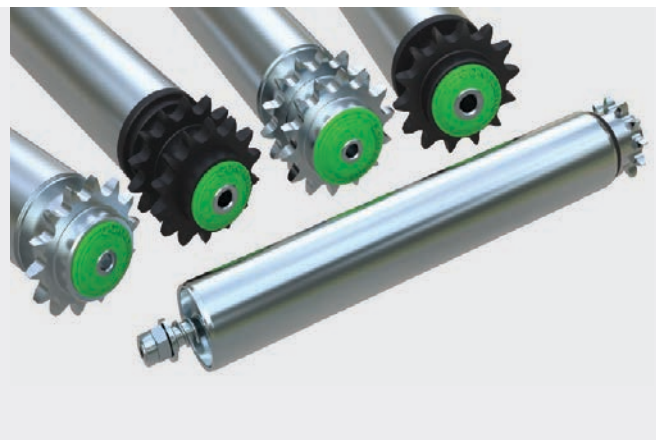

TAPERED CONVEYOR ROLLERS

We manufacture tapered sleeve rollers to suit an inside radius of either 500mm or 1200mm. Both the sizes can be assembled with choice of bearing types to suite your requirements. Free running bearings are best suited to gravity conveyors while precision bearings are usually fitted for continuous running applications such as grooved or sprocket driven rollers.

ACCUMULATION CONVEYOR ROLLERS

Accumulation rollers have the ability to remove drive in segments or zones to allow conveyed products to stop or collect at will. These rollers are used to hold or buffer products into areas such as merges, sortation or pelletizers. We manufacture rollers to suit size of 50mm, 60mm, 76mm.

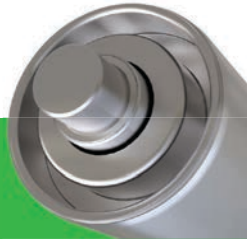

ROLLER CONVEYOR ACCESSORIES

We have a wide range of roller conveyor accessories available with us to satisfy stringent demands. From handling O-ring conveyor, Poly v belt conveyor, Flexible skate wheel, Free wheel, Flow rack, PVC sleeve through for special application material handling with or without conveyor. Optional: For any specific requirement, please contact our team.

SHAFT CONDITIONS

SPRING LOADED SHAFT

Un-machined round shaft are suitable for spring loaded rollers. Easy and toolless mounting between conveyor side frame.

HEX END SHAFT

Hexagonal shaft for punched conveyor side frame with spring loaded. Hexagonal shape prevents the shaft from rotating in the side frame.

INTERNAL THREAD SHAFT

Round shaft can be both end drilled and tapped at each end to enable the roller to be bolted between the conveyor side frame, thus increasing the rigidity of the conveyor.

MILLED FLATS SHAFT

Round shaft with two sided milled flats are used in conveyor with slotted frames where rollers are lowered into position. In most cases the shaft is supplied fixed within the rollers.

SPECIALISED ROLLERS

PVC SLEEVE ROLLERS

All steel rollers are offered with options of PVC rubber sleeve. 2mm PVC sleeve uses for application of high friction and lightweight product transfer.

24V POWER ROLLERS

50mm 24V DC brushless motorized rollers are used in zero-line pressure conveyor application. Rollers can be supplied with additional control cards, whilst consuming less energy than other comparable powered rollers.

Inspired by Excellence

QUALITY

Conveyor roller is the most important component of many transportation solutions. We manufacture conveyor rollers at our own in-house production facility equipped with modern systems and technology! Our quality analysts make sure that no materials and conveline roller leaves the production facility unchecked.

PLANNING

We are committed to work with you to find out the best suitable roller as per your specific application. Our factory-trained staff will work with you to create the best possible and user-oriented solutions.

We create customer experience into a reality with

- > Short response times
- > Highest quality standards with our own production facility
- > Maximum efficiency due to optimal planning times and short lead times

INNOVATION

We understand existing market challenges, needs and futuristic expectations of customers and create innovative products and solutions.

SERVICE

We take care of all service requests received from our client base.

As a manufacturer, we always urge our customers to take leverage of our expertise in this industry. With our fastest delivery time, we can provide any requirement as requested by you. We also take requests to transport materials at your requested sites.
